SURF User Knowledge Base

Welcome to the SURF User Knowledge Base

for users of the Data and Computing Services !

In these pages you can find user information about our services.

If you enter some search terms below a list of relevant pages is shown.

For more advanced searches you can use the search box in the upper-right. This will allow you to filter on specific labels.

System Status

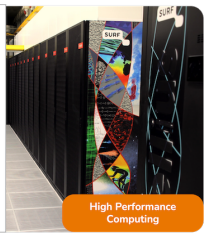

Rais

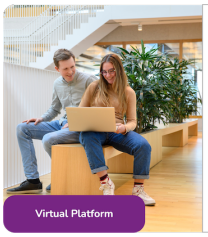

Snellius

The dutch national supercomputer

Research Cloud

Virtual research workspaces

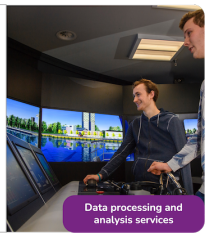

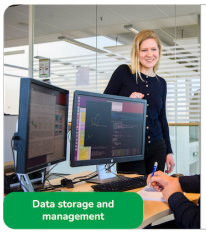

Research Drive

securely and easily store and share research data

Spider

dynamic, flexible, and customizable platform

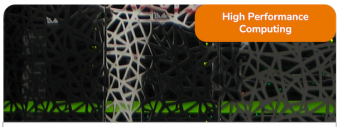

Object Store

Store large amounts of data

Collaboratorium

visualization and presentation space for science and industry

ODISSEI Secure Supercomputer

HPC facility with strict security measures for processing sensitive data

dCache

scalable storage system

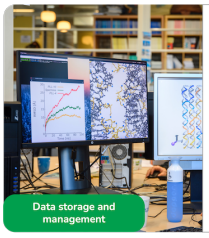

GRID

limitless computing potential with a series of international clusters

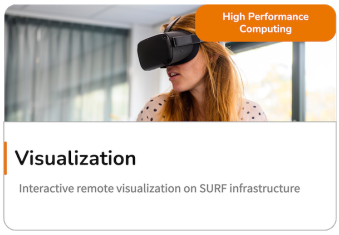

Persistent Identifiers

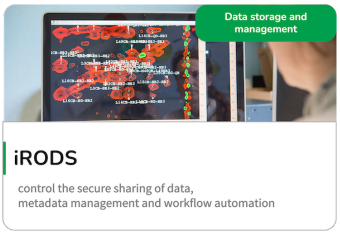

Make data findable

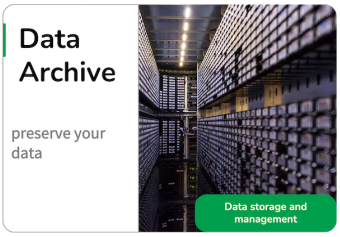

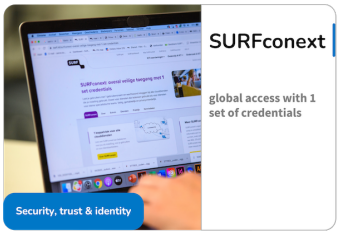

Data Repository

Publish your data
